## Retention Workgroup Report for 3.13.2026 Student Affairs Committee

### Retention Workgroup Update:

At our recent Retention Workgroup meeting, we identified three priority items that we will begin focusing on moving forward.

First, we discussed improving communication around Early Alert Completion, particularly ensuring that we are completing the loop by circling back with instructors who submit Early Alerts so they are aware of the follow-up and outcomes.

Second, the group is currently searching for the most recent version of the Retention Workbook so we can review and utilize the most up-to-date resources and strategies.

Finally, Aly reminded the group that Financial Aid still has funds available to assist students who may be struggling to pay balances on their accounts, which could be an important resource for students in need.
